information for the TEM Lab(II) of Supplementary work

for doing your last TEM Lab section of Supplementary work (at Room E-531), you need bring a rule, a calculator and the TEM compendium (by Professor Jan Ketil Solberg) for indexing of diffraction pattern.

all of your Lab results are put (also for future SEM Lab), together with all relevant information at,

http://folk.ntnu.no/yingday/NilsYD/2009_stud_Labs/

you need to print out (after a little bit processing) your results before the Supplementary work section.

Schedule SEM lab revision 2

I had overlooked that Friday in week 18 is 1th of May. In the new schedule, those groups are moved to available lecture times since SEM lectures finish in week 17. Students 17 and 40 have also changed time.

Schedule SEM lab revised

I have done a necessary change in the SEM lab schedule for students 40 and 17. The new schedule is as follows:
